

Angular - Summary

- Aditya Kumar
Chief Technology Officer, edwisor.com

We will cover with the following concepts

- 1) Building your application
- 2) Summary
- 3) What comes next?

Building an application is easy

Ng build comes with multiple variants

- Official deployment guide - <https://angular.io/guide/deployment>
- ng build
- ng build --prod
- ng build -- prod --build-optimizer

We have covered the basic aspects of Angular applications

- Setting up application
- Components
- Templating
- Services
- Http and observables
- Forms and two way binding

But a lot of difficult concepts are yet to come

- Complete architectural overview
- Shared components
- Advance routing
- Interceptors
- Live communication using socket.io

The next steps are ...

Advance Angular
